Rear Admiral S. Mohapatra, VSM. IN (Retd.)
Executive Director (Production)

TO WHOMSOEVER IT MAY CONCERN

CHW Forge was earlier doing Forging and Ring Rolling of Steel materials only.

Seeing their facilities, capabilities, quality standard and work culture during market survey, the firm was persuaded for rolling of variety of aero grade Aluminum Alloy components for airframes of BrahMos Supersonic Cruise Missile which was readily agreed. The company has now successfully executed the task of manufacturing more than 100 sets out of 6 varieties of exotic aerospace grade Aluminum material including setting up of the facilities in a record time. The quality of the product has been found to be superior to the materials procured from Russia apart from being cost effective.

The positive and pro-active approach of the firm at all levels towards taking up challenging tasks deserves appreciation.

The firm will certainly soar sky high in earning user confidence and become one stop solution provider for all types of materials processing in the future, should they continue the present trend.
